Bugfixes/maintenance

Create new myAbilia account from login page

- Create account available from MEMOplanner HW

- Created account can be used right away

Temporarily disable alarms

- Feature can be activated in Quick settings.

- If feature is activated a button to disable alarms is visible in all main views.

- When pressing button, user is informed that all alarms will be disabled until midnight.

- Alarms are automatically enabled 23:59 every day.

- Disable alarms only affects the device where it was turned on.

ABILIA

Sync images from Favourites in MEMOplanner to myAbilia

- All images in My photos tab Favourites are synced to Favourite folder on Image archive in myAbilia.

- Sync starts when My photos is closed.

- Images are synced between all MEMOplanner devices with same account.

Reminders after activity have same alarm type as activity

- A reminder to tick a tickable activity will use the same alarm type as the activity. (New)

- A reminder <u>before</u> an activity will use the setting for reminders in Settings/Calendar/Alarm setting and is independent on alarm type of activity. (No change from current implementation)

ABILIA

Speech at end time on reminders

If an activity have speech at end-time the speech will be read out also on reminders to tick activity.

Reminders after an activity occurs on unticked tickable activities.

ABILIA

Easier to untick an activity

- Tickable activities can be easily unticked if the tick for instance was done by mistake
